As set forth in §4.1 of the ANSI/ASSE Z590.3 standard, a hazard assessment must be conducted early in the design phase, followed by an inventory of those risks of injury or illness than can be identified or predicted, and measures needed to mitigate those risks through the design solution:

a) ANSI/ASSE Z690.1-2011: Gives the definitions of generic terms related to risk management. Also aims to encourage a mutual and consistent understanding of, and a coherent approach to, the description of activities relating to the management of risk, and the use of uniform risk management terminology in processes and frameworks dealing with the management of risk.
