This is an excellent book on how to automate your workflow using Grunt, JavaScript's task runner. Brian P. Hogan has written a lightweight book that is heavy on the content you need, stripping away all of the unnecessary text, and getting right to the heart of the matter: ways to use Grunt.

Automate with Grunt: The Build Tool for JavaScript: Hogan ...

Every company has grunt work. It's the type of tasks that just about anyone can handle; it just requires the time and effort. And well, no one really likes doing that. Your highly-skilled employees aren't too happy about having to do menial work - and as it's widely known, the happier your employees, the more productive they'll be. Grunt work could be, for example, taking all of the ...

easier your job becomes. After you've configured it through a Gruntfile, a task runner can do most of that mundane work for you—and your team—with basically zero effort.

Grunt: The JavaScript Task Runner

Because a colleague went out of business and referred a lot of work my way, this was the first tax season that I found myself thinking that, “gee, I could use an employee (to do the grunt work).” I think GW will be the answer to that, going forward. It was a relief, late in the season, to hand off the tedious data entry work.

the content of the book.

Automate the Boring Stuff with Python

Doing calculations in Jupyter is enjoyable but can require endless `print()` statements with f-strings to show your results.. With `handcalcs`, use the `%%render` cell magic and your Python calculation is rendered with the symbolic formula, followed by the numeric substitution, and then the result, just as though you had written it by hand.. Works as both a cell magic and as a decorator on your ...
