is the easy way to get anything and everything done with the tap of your thumb. Find trusted cleaners, skilled plumbers and electricians, reliable painters, book, pdf, read online and more good services.

### Bmw M10 Engine

The BMW M10 is an SOHC four-cylinder petrol engine which was produced from 1962-1988. It was BMW's first four-cylinder engine since the BMW 309 ended production in 1936 and was introduced in the New Class sedans. Over 3.5 million M10 engines were produced during the M10's 26 year production run, and it was used in many BMW models.

I've had an M10 stroker with the Sport Evolution 87 MM Crank for 10 years or so. With 92 MM pistons it has 2313 CC of displacement. The only mods are the front crank seal which is the same as for the 84 MM S14 crank and some minor clearancing of the block on either side where the rods would contact the block without the mods.

This checklist is what we recommend for those looking to rebuild their BMW 2002's M10 engine and want to get more "spice" out of it. This setup will run well on 91 octane fuel, and last a very long time if properly maintained. It is not a "race-car-for-the-street" build that will need replacing in less than twenty thousand miles.

BMW M10, the four-cylinder engine that the M30 was based on. BMW M20 , the smaller straight-six engine which was sold alongside the M30 for many years. BMW M88 , the high-performance straight-six engine that was sold alongside the M30 from 1978-1989

### BMW M30 - Wikipedia

Led by Alex von Falkenhausen, chief of engine development and a noted BMW car and motorcycle racer, the M10 team soon engineered larger and more powerful variants. The 1800 sedan featured a 1.8-liter, 90hp version while the 1600's engine made 83hp. The 1966 model year saw the debut of a 100hp, 1,990cc variant in the 2000 sedan.

### BMW M10 | Hemmings

This 2.0-liter M10 inline-four was built for a 1972 BMW 2002 that was lost in a flood while the engine was out for service, and is said to have been in dry storage for about 20 years prior to its acquisition by the seller in 2019. The engine was disassembled at the time of purchase, and the seller has cleaned, painted, and reassembled it.

BMW single-cam M10, M20, and M30 engines need properly formulated oils. Newer oils often lack enough of the ZDDP (Zinc dialkyldithiophosphate) our older engines need. The reasoning for reducing, or sometimes even removing ZDDP, is that by removing it expensive modern catalytic converters, and O2 sensors, would last a bit longer.

### BMW M10, M20, M30 Engine Oil Guide (ZDDP)

The M10 was the engine that BMW what it is today. 1987 E30 316 with 1800cc Pierburg carb M10.
