/ fɪʃ / plural fish or fishes A1 [C or U] an animal that lives in water, is covered with scales, and breathes by taking water in through its mouth, or the flesh of these animals eaten as food: Several large fish live in the pond.

FISH | meaning in the Cambridge English Dictionary

fishes We collected 2681 fishes, representing 46 species and 10 families. From Cambridge English Corpus Anti-predator defence mechanisms may have evolved during the process that enabled these tadpole species to occupy large permanent streams, which often shelter predatory fishes.

FISHES | meaning in the Cambridge English Dictionary

Fishes have a more or less smooth, flexible skin dotted with various kinds of glands, both unicellular and multicellular. Mucus-secreting glands are especially abundant. Poison glands, which occur in the skin of many cartilaginous fishes and some bony fishes, are frequently associated with spines on the fins, tail, and gill covers.

Integument - Fishes | Britannica

Fish and their families have a range of body sizes from the massive whale shark down to the smallest fish under a centimetre in length. Despite this diversity, all fish have a backbone or a notochord, and all breathe using gills. Worldwide there are over 32,000 described species of fish, with over 4,400 from Australia.

Fishes - The Australian Museum

CDFW is temporarily closing its high public use areas, including visitor centers and license counters, to help slow the spread of COVID-19 (coronavirus). Before heading to a CDFW facility, contact the regional headquarters office to determine if that facility is open. Information on purchasing licenses, permits, tags and other entitlements, can be found on CDFW's Online License Site.

Fishes

The fishes of the Fraser River include salmon and sturgeon. Speaking about "two beer" and "two beers"—most languages have odd little local differences that can turn into dialects and eventually into distinct languages.

Ask the English Teacher: Fish or Fishes?

The biggest fish in the world is the giant whale shark, which can grow to nearly 60 feet, or the length of two school buses. It weighs over 25 tons and eats mainly plankton. It has over 4,000 teeth, though they are only 3 mm long. Those fishes will be so much more beautiful if you color their veil !

Fishes - Coloring Pages for Adults - Just Color
