Memory From Mind To Molecules

Kandel continues the discussion by examining the molecular basis for storage of declarative memory and for the conversion of short-term memory to long-term memory. The storage of declarative memory occurs via a family of processes that occur in the hippocampus called long-term potentiation (or LTP).

The long journey from the physical molecules to the non-physical mind starts with a first step. Squire and Kandel have taken that first step in a masterful attempt to bridge the certainty of their laboratory measurements of brain function with the elusive, receding, transfinite virtuality of the human mind at the other end of the bridge.

Review: Memory: from Mind to Molecules by Squire, Latry R. and Kandel. Eric R Behold, another great book about neuroscience. This, however, is probably a textbook for students of brain science and requires much more effort than two others I have recently read, Consciousness and the Brain by Stanislas Dehaene, and The Rough Guide to the Brain by Barry J. Gibb. Inasmuch as I am semi-literate in ...
