Watch Mysteries of Modern Physics: Time | Prime Video

Mysteries of Modern Physics: Time. Time rules our lives. From the rising and setting of the sun to the cycles of nature, the thought processes in our brains, and the biorhythms in our day, nothing so pervades our existence and yet is so difficult to explain. Time seems to be woven into the very fabric of the universe.

Mysteries of Modern Physics: Time by Sean Carroll

Time, as a fourth dimension, is a mystery that Professor Sean Carroll partly unravels in a lecture series titled Mysteries of Modern Physics. Carroll helps Physics' dilettantes, like this essayist, broaden understanding of the mechanics of the universe; albeit at the cost of some confusion and a headache.

...

That difference is the arrow of time. Explaining why time has an arrow is a primary concern of modern physics. We will see that it does not arise from quantum mechanics or particle physics. Rather, it is due to the increase of entropy—a way of measuring how messy or disorderly a system is—as time passes.
