Principles Of Physical Geography by Monkhouse, F J

The principles of geography are those that must be met by those involved in any study of this science. Among these principles are the location, the description or the comparison. By using them, a correct development is achieved in any investigation or geographical description. The term geography comes from the Greek words "Gea", which means Earth, and "grafia", whose meaning is "description".

Principles of physical science | Britannica

Arthur Holmes FRS FRSE (14 January 1890 – 20 September 1965) was a British geologist who made two major contributions to the understanding of geology. He pioneered the use of radiometric dating of minerals and was the first earth scientist to grasp the mechanical and thermal implications of mantle convection, which led eventually to the acceptance of plate tectonics.
