### Spirits of an Industrial Age eBook by Jacob Middleton ...

In Crisis & Renewal, where I first wrote about them, I felt that they exemplified Max Weber’s “Spirit of Capitalism”. I called them “hunters of the spirit”. The First Industrial Revolution in 18 th Century England came after a century of political, religious and social turmoil. The Civil War of the 1640s had culminated in the execution of Charles I and the establishment of a parliament that was no longer prepared to be ignored by the monarchy.

Spirits like Bourbon use charred oak, which will change the nature of the interaction. To further complicate—and enrich—things, distillers may choose to age or “ finish ” their spirits in casks or...

### Aging Spirits: When And Why It's Done | VinePair

The Industrial Age is a period of history that encompasses the changes in economic and social organization that began around 1760 in Great Britain and later in other countries, characterized chiefly by the replacement of hand tools with power-driven machines such as the power loom and the steam engine, and by the concentration of industry in large establishments.

### Industrial Age - Wikipedia

The first industrial age Development of iron technology. The last half of the 18th century saw the unfolding of a series of events, primarily in England, that later historians would call the first Industrial Revolution, which would have a profound influence on society as a whole as well as on building technology. Among the first of these events was the large-scale production of iron, beginning ...

Denatured alcohol, also called methylated spirits (in Australia, New Zealand, South Africa, and the United Kingdom) or wood spirit or denatured rectified spirit, is ethanol that has additives to make it poisonous, bad-tasting, foul-smelling, or nauseating to discourage recreational consumption.It is sometimes dyed so that it can be identified visually.

### Denatured alcohol - Wikipedia

Industrial spirits often have similar properties to alcohol and are chemically similar to drinking alcohol. However, these other types of alcohol may cause a person to become violently ill, damage vital organs or become unconscious when consumed. Industrial spirits should never be ingested under any circumstance.

The TTB regulations at 27 CFR 5.11 define the term “age” to mean the period during which, after distillation and before bottling, distilled spirits have been stored in oak containers. For bourbon whisky, rye whisky, wheat whisky, malt whisky, or rye malt whisky, and for straight whisky other than straight corn whisky, the "age" is the period during which the whisky has been stored in charred new oak containers.
