Question: Evaluate the probability of correctly guessing exactly 7 of the 10 questions on a quiz. Use probability of success $p=0.5$ (since you have got a 50-50 chance of guessing each single ...

Evaluate the probability of correctly guessing exactly 7 ...

Find the probability that the box of chocolates will be won by a 17 year old, given that the gift token is won by a 17 year old male student. I tried using the formula $P(A \text{ and } B) / P(B)$: Here's one attempt: $[(9/40) * (15/39)] / 16/40$. I did a few other tries, trying different logic, but the answer should be 0.467. I'm very confused.
