Stretching and Shrinking - Weebly
Stretching and Shrinking – Investigation 3 ANSWER KEY HW: SS p. 60-77 # 35-39 35. a. The birds are not similar since the ratio of base length of the larger figure to the base length of the smaller figure is not the same as the ratio of the height of the larger figure to the height of the smaller figure.

Answers To Investigation 3 Stretching And Shrinking
Predict the ways that stretching or shrinking a figure will affect side lengths, angle measures, perimeters, and areas Use the properties of similarity to find distances and heights that cannot be measured directly Use scale factors or ratios to find missing side lengths in a pair of similar figures

CMP3 Grade 7 - Connected Mathematics Project
The number used to multiply the lengths of a figure to stretch or shrink it into a similar image. A scale factor larger than 1 will enlarge a figure. A scale factor between 0 and 1 will reduce a figure. The scale factor of two similar figures is given by a ratio that compares the corresponding sides:

7-3 Stretching and Shrinking - Concepts and Explanations ...
horizontal stretching/shrinking changes the x-values of points; transformations that affect the $\,x\,$-values are counter-intuitive Vertical/Horizontal Stretching/Shrinking usually changes the shape of a graph.

Horizontal and Vertical Stretching/Shrinking
Answers will vary. 26. Answers will vary. Sample answer: 10 to 6 and 15 to 9. In each answer, the division of the first number by the second should give the same result as the division of the first number in the question by the second number in the question. 27. Answers will vary. Sample answer: 8 to 2 and 20 to 5. In each answer, the division
