The number 32 is the subnet multiplier. You can quickly find the subnet multiplier using one of two methods: Method 1: Subtract the last nonzero octet of the subnet mask from 256. In this example, the last nonzero octet is 224. So, the subnet multiplier is $256 - 224 = 32$. Method 2: The decimal value of the last bit borrowed is the subnet ...

Cisco CCENT Practice and Study Guide: Subnetting IP ...

Adding New VLSM Subnets There are different methods in determining subnets. The first and easiest to manage is standard length subnets. This means that each of the subnets created has an equal amount of hosts. The different comes with variable length subnet masks known as VLSM. With VLSM you have a different amount of hosts for each subnet. During week 4's readings chapter 20 highlighted all ...
