Compost is created from the aerobic decomposition of many materials usually considered waste, including food scraps, animal manures, leaves, straw, and more. Composting occurs when carbon-rich materials ("browns"), like straw and leaves, are mixed with nitrogen-rich materials ("greens"), like food scraps and manure.

The Rodale Book of Composting, Newly Revised and Updated ...

Rodale has been a backbone of the early organic gardening movement. Unfortunately, their publishing business was bought out and their beautiful organic farms of 80 or so years were up for sale for "development". However, this edition of the Rodale Book of Composting was updated in 2017, and is full of important information.
